Convert Units Without Getting Fooled: The Chart Method

Set the reference equivalence Divide to obtain the result

Place both TO convert

units side by side and 200 cm in meters,
indicate Their relationship of THEIR ROE perform 200 divided
per 100 for
Departure units Arrival units get 2 m.

base (e.g. 100 cm = 1 m).

Convert meters to kilometers

With 1000 m = 1 km, for 3000 m, With 1000 W=1kW, for 4500 W,
divide 3000 by 1000 to get 3km. | | divide 4500 by 1000 for

get 45kW. Ô:
